FHWA Juneau Access Improvements Supplemental EIS

EPA recently received for 30-day review the Preliminary Draft SEIS for the Juneau Access Improvements project. This is the second supplement which responds to court decision to evaluate a stand-alone ferry alternative as well as incorporates new and updated information. Alternative 2B is still identified as the preferred alternative. EPA worked extensively with FHWA and ADOT to minimize effects associated with this alternative in the previous supplemental EIS and 404 process; it appears that negotiated minimization and mitigation is still reflected in the preferred alternative. 404 Public Notice is expected to run concurrent with the public Draft SEIS.

Corps Arctic Deep Draft Port EIS

Corps project manager has given verbal indication that the Corps is okay with the MOU EPA has drafted and signing is expected this week.
